Completed on	Monday, 31 August 2026, 9:02 AM
Time taken	3 mins 48 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Problem Statement:

Given a sorted array of integers say arr[] and a number x. Write a recursive program using divide and conquer strategy to check if there exist two elements in the array whose sum = x. If there exist such two elements then return the numbers, otherwise print as "No".

Note: Write a Divide and Conquer Solution

Input Format

First Line Contains Integer n – Size of array

Next n lines Contains n numbers – Elements of an array

Last Line Contains Integer x – Sum Value

Output Format

First Line Contains Integer – Element1

Second Line Contains Integer – Element2 (Element 1 and Elements 2 together sums to value "x")

Answer: (penalty regime: 0 %)

```c
#include <stdio.h>
#include <stdlib.h>

int binarySearch(int arr[], int low, int high, int target) {
    if (low > high) {
        return -1;
    }
    int mid = low + (high - low) / 2;
    if (arr[mid] == target) {
        return mid;
    }
    if (arr[mid] > target) {
        return binarySearch(arr, low, mid - 1, target);
    }
    return binarySearch(arr, mid + 1, high, target);
}

int findPairDC(int arr[], int low, int high, int x, int *num1, int *num2) {

    if (low >= high) {
        return 0;
    }

    int mid = low + (high - low) / 2;

    if (findPairDC(arr, low, mid, x, num1, num2)) {
        return 1;
    }

    if (findPairDC(arr, mid + 1, high, x, num1, num2)) {
        return 1;
    }

    for (int i = low; i <= mid; i++) {
        int complement = x - arr[i];
        int index = binarySearch(arr, mid + 1, high, complement);
        if (index != -1) {
            *num1 = arr[i];
            *num2 = arr[index];
            return 1;
        }
    }

    return 0;
}

int main() {
    int n;
    if (scanf("%d", &n) != 1 || n < 2) {
```

	Input	Expected	Got	
✔	4 2 4 8 10 14	4 10	4 10	✔
✔	5 2 4 6 8 10 100	No	No	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
